

A complex network graph visualization. The graph consists of numerous nodes, primarily colored blue and black, connected by a dense web of thin gray lines. Several nodes are highlighted with green downward-pointing triangles. Three specific nodes are labeled with text: 'collins, francis' (a blue node on the left), 'redfield, robert' (a black node in the center), and 'conrad, patricia' (a black node on the right). The graph shows a high degree of connectivity, with many nodes having multiple edges. The layout is somewhat circular, with clusters of nodes on the periphery and a dense core.

collins, francis

redfield, robert

conrad, patricia
